

- Featuring eWARP™, the exclusive 4-quadrant digital keystone correction technology. Set the Premiere 50HD at a 40-degree angle to the screen and project a squared up image without distortion.
- Faroudja DCDi™ and 3:2 pull down video processing for excellent image quality reproduction.
- 1700:1 contrast ratio ensures superior definition of projected images so that you will not miss any of the film's details.
- The Wide XGA resolution of the Premiere 50HD protects the integrity of the filmmaker's vision by projecting the video in its native format.

The Studio Experience

Premiere 50HD combines revolutionary new technology with state of the art features for the ultimate home theater projector. Faroudja DCDi™ video processing and 3:2 pull down will make your images clear and distortion free. The Mustang HD2 DLP™ chip with 6-segment color wheel creates life-like images with superb definition and detail. 1700:1 contrast ratio completes the package for uncompromising video quality. The exciting new technology of eWARP™ (4-quadrant digital keystone correction) allows for the ultimate flexibility when installing this home theater projector in your home. HDCP enabled and whisper quiet 30dB noise rating round out the unmatched set of features that put this projector at the top of everyone's must-have list.
