

# INFOCUS® TD30

## LCD THIN DISPLAY

## INSTANT IMPACT, IMMEDIATE RESULTS

**DISCOVER THIN DISPLAY FROM INFOCUS CORPORATION.** The InFocus TD30 combines exceptional brightness, with reliable, long-life operation in an ultra-thin profile. The TD30 is a unique solution for a variety of needs— from signage to monitoring to business collaboration, delivering long-running visual impact in a breakthrough form factor.

### SLIM + SLEEK = IMPACT

← 4"/10.2 cm →

# InFocus®

### LASTING IMPRESSIONS

#### — BIG, BRIGHT IMAGES ANYWHERE

The InFocus TD30 thin display transforms plain walls into information environments—in lobbies, at trade shows, in waiting rooms, and in airports. The TD30 brings new life to corporate, retail, entertainment, transportation and other public environments with large, dynamic images from DVD, computer, and more. It also turns tiny rooms into dynamic, collaborative meeting spaces. Enliven retail stores with dynamic signage, display multiple data feeds on trading floors, show operational status on a production line – the big bold display makes it easy to read and the slim design fits a variety of spaces. Now businesses of all types can take advantage of thin display at an affordable price.

#### — INSTANT COOL

Just 4"/10.2 cm thin, the InFocus TD30 turns on immediately and is instantly bright, even in environments with bright ambient lighting. Fully integrated NTSC TV tuner and speakers let you do more right out of the box. Allowing you room for creativity with the slim form factor, the TD30 is a perfect solution for those challenging spaces where you need to grab attention, looking great anywhere, all the time.

#### — A REAL WORKHORSE

The InFocus TD30's LCD backlights are rated to 50,000 hours (minimum). Low power consumption minimizes your total cost of ownership. And it couldn't be simpler to use. Just hang it on the wall or place it on the table and plug it in. It's outstanding quality in a cool-running, reliable LCD display that can operate continuously.

#### — FANTASTIC FLEXIBILITY

The InFocus TD30 offers seamless compatibility with multiple PC and video sources at just about any resolution. Intelligent picture-in-picture functions allow multiple source display, while SRS® audio and 5-watt stereo speakers put the "A" back in A/V.

## LONG-RUNNING IMPACT

Transform any static space into an exciting environment that commands interest. The InFocus TD30 creates interest even before you plug it in: executives offices, huddle rooms, retail outlets, restaurants & bars, large control rooms, applications, public venues, hotel lobbies, reception/waiting areas, airports, and other information hubs.
