

LPTM350

InFocus[®] LPTM 350

Conference room features in a personal package

Full featured, extremely bright and small enough to take with you

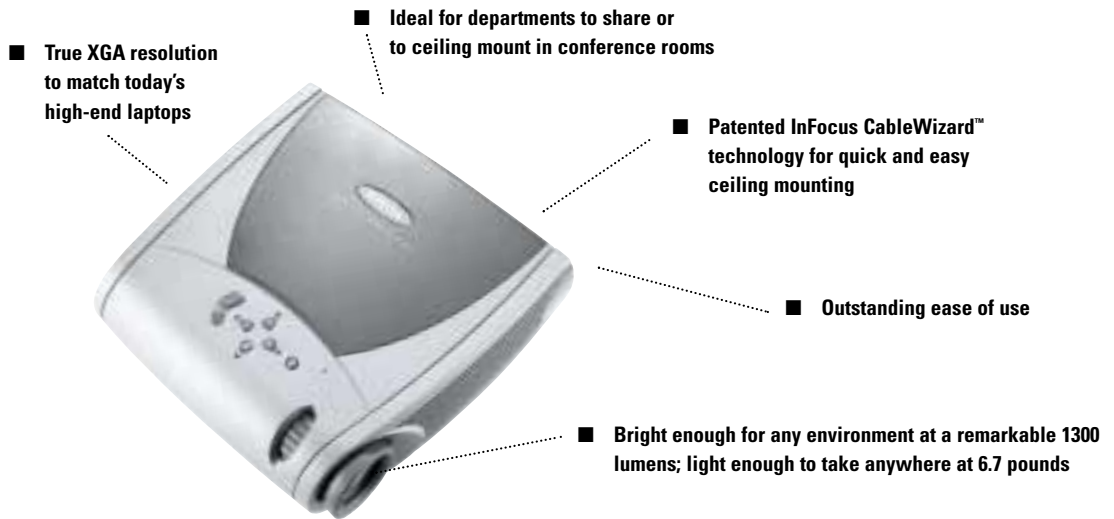

- True XGA (1024 x 768) resolution
- Brilliant colors! 1300 ANSI lumens
- Only 6.7 pounds
- DVI digital and analog connectivity with USB

- InFocus Home Theater Quality™ video

- Onboard control panel and Executive Plus™ Remote control
- Manual zoom and focus lens
- HDTV compatible

The InFocus LPTM350 is the personal projector that packs all the features of a premium conference room projector into a portable 6.7-pound package. Offering true XGA resolution with 1300 lumens of brightness and outstanding image quality, it's the brightest little powerhouse money can buy. And with DVI digital and analog connectivity with USB, it's ready for the technology of today and tomorrow. This ultra-portable unit is ideal for demanding presentation requirements, and easily shared among group members. The LP350 is an excellent choice for ceiling mounting in a conference room, where presenters frequently rely on richly detailed images — such as financial spreadsheets or drawings — to convey vital business information. With the LP350, companies can standardize on best-selling InFocus projectors in every setting, from road warrior's sales pitches to conference room strategy sessions.

Truly Outstanding Image Quality

Today's technology buyers understand that to get optimal performance, XGA computers should be paired with projectors that have the same great resolution. InFocus created the LP350 to match the unsurpassed image quality of these high-end machines. It offers true 1024 x 768 XGA resolution (40% more pixels than SVGA), delivering crystal-clear images and high-contrast text that leap out for maximum visual impact.

Share It or Mount It

The LP350 meets all the requirements of technology-savvy executives who demand outstanding equipment to support

critical business presentations. Sleek and stylish, compact and easy to use, it's an excellent resource for people working in high-exposure departments. Because it has conference room features in a portable package, co-workers can easily carry it between locations for every meeting, presentation or training. In addition to its streamlined dimensions, the projector is ideally suited as a shared resource because it's so easy to operate. Even first-time users can turn it on and project. And, the LP350 can be quickly ceiling-mounted in conference rooms for permanent projector availability.

Connectivity That Works Today and Tomorrow

Connectivity is all about offering the right options. The LP350 is one of the only portable projectors to offer the benefits of two data connectors. The patented InFocus CableWizard connector when coupled with the optional CableWizard cable makes ceiling mounting easy and inexpensive. The LP350 also has the revolutionary M1-DA connector for DVI digital and analog, and USB connectivity. Use it to connect to today's analog laptop and tomorrow's digital upgrade — the LP350 is fully compatible with the technology of the future, today. Only InFocus offers you a projector that delivers today's most cutting-edge features, protecting you from obsolescence of your investment.

So Easy, It Takes the Worry Out of Presenting

InFocus takes ease of use to new heights with the LP350. It starts with no-hassle setup — just take the unit out of the box, plug in the power cord and connect the projector to your laptop. Setup is so clear and intuitive; you simply can't do it wrong. In fact, it takes longer to boot up most laptops than it does to set up the LP350. All the features and functions you need are clearly labeled and instantly accessible.

Standardize on the Best

The LP350 has all the premium features you expect in a high-end conference room projector, including true XGA resolution, connectivity options, InFocus Home Theater Quality Video, HDTV compatibility and superior brightness — with the added benefit of portability. This outstanding machine demonstrates once again why InFocus is the worldwide leader in data/video projection. Adding the LP350 to your company's suite of technology tools equips you to handle crucial presentations with panache. And, when you standardize on InFocus, everyone benefits from the intuitive ease-of-use features standard on every projector. Forget training — all features and functions are familiar from day one. And forget scrambling for help when you need sales or service — there's just one number to call.

Service You Can Count On

Because we believe top performance must be backed with top service, InFocus offers you technical support 7 days a week, 24 hours a day* — We work whenever you work! (*Available In U.S., Canada, EU Countries and Switzerland only)
