The InFocus LPTM340B packs all the features you expect in a small conference room projector into a stylish portable package. It's bright, quiet and delivers more impact than flipcharts, slides and overheads. Finally, digital projection technology that's easy to use, full of features and affordable.

SO EASY

With the LP340B just walk in any room and launch your show. No awkward delays for adjusting the light. No distracting projector noise. No more fumbling with slides and overheads that became outdated the minute you had them printed. The LP340B offers native SVGA resolution, ideal for typical chart-and-graph presentations, with integrated audio and video for true multimedia power.

SO AFFORDABLE

The LP340B is an excellent value, stretching budget dollars with its versatility. Computer software coupled with InFocus projection yields a significant reduction in presentation expenses. Unlike 35mm

slides, overheads or color printouts, there are no production charges from outside vendors. Most importantly, with the power of digital projection you remain in control of your presentation at all times. Because information is instantly accessible on the computer, it can be corrected or updated in real time – whether it's minutes before a meeting, or even during your presentation. Never get stuck showing slides with errors or be embarrassed by outdated information – that's value that can't be measured in dollars. And with the LP340B anyone can afford a projector from InFocus, the worldwide leader in digital projection. Best of all, this economical unit requires no sacrifice of quality or features – the LP340B combines premier brightness, connectivity and portability to demonstrate once again why InFocus sells more projectors than any company. The LP340B puts leading-edge projection technology into the hands of everyone.

SO EASY, SO MANY FEATURES YOU CAN'T DO IT WRONG

InFocus takes ease of use to new heights with the LP340B. It starts with no-hassle setup: just take the unit out of the box, plug in the power cord and connect the projector to your laptop. Setup is clear and intuitive; you simply can't do it wrong. In fact, it takes much longer to boot up the typical laptop than to setup your projector. With only six buttons to control all features, the LP340B couldn't be simpler to run. Even first-time users just turn it on and project.

SERVICE YOU CAN COUNT ON

24
7
