

The Samsung DigitAll Philosophy

DigitAll Convergence is at the heart of the Samsung philosophy. Digital refers to new advances in semiconductor technology that enable us to create products with more features, while at the same time driving down size, weight and power consumption. Convergence is the evolution of computers, cell phones, PDAs and other devices into a new generation of combination products. As a pioneering technology company, Samsung is a leader at both creating and bringing these products to market. The bottom line: You can expect more from Samsung ■

Meticulous attention to detail makes Samsung a leading provider of plasma displays.

DigitAll plasma

Our dedication to innovation has made us an industry-leader in plasma display technology.

Samsung's plasma display monitors represent the latest advancements in plasma display technology. We have the most sophisticated Research and Development facilities in the world. Those facilities enable us to create plasma displays that lead the industry in both picture quality and functionality. It's our commitment to remaining on the leading edge of technology that makes our plasma displays the smart choice for a wide variety of professional applications.

Our plasma displays are produced in the most advanced manufacturing facilities in the world.

Not just digital...**Samsung DigitAll!**

DigitAllservice

We're Here to Help, When You Need Us
All Samsung plasma displays come with our industry-leading 24/7 technical support. Just call 1-800-SAMSUNG for assistance.

On-Site Service
All Samsung plasma displays are backed by our 1-year limited warranty. We come to you, providing on-site service usually within two business days. (Restrictions may apply.)

Additional Product Information

DigitAll innovation

Plasma Product Guide

DigitAllqualitydisplay

Samsung's new plasma displays are some of the lightest on the market and incorporate the latest advances in video picture quality. Each measures a slim, 3.5" in depth for convenient placement just about anywhere. And they can be used to display a variety of input including video, PC, DTV and many others.

Thanks to a unique combination of advanced Samsung technologies, you're guaranteed superior picture quality. Colors will be brighter and images will jump off the screen with attention-grabbing power.

Need to display data? No problem. Samsung's unique Detail Enhancement ensures text and graphics stay sharp and clear no matter what type of input signal you supply. Our special signal processing circuitry is capable of scaling high-resolution images pixel by pixel for superior accuracy.

■ **Constant color temperature (Always White Algorithm)** This technology delivers the best color reproduction by minimizing color temperature variation caused by changes in brightness.

■ **Progressive Scan System** Displays all the lines progressively at once for stable, flicker-free images.

■ **Anti-Reflection Screen** A multi-layered anti-reflection screen filter reduces screen reflections for more comfortable viewing in highly-lit environments such as airports, malls, control-centers, etc.

DigitAllusability

■ **RS232C** Samsung's unique Multi-Display control software allows simultaneous control over several plasma displays from a single PC source.

■ **Real Time Clock** Maintains the exact time even if the display becomes disconnected or a loss of power occurs.

■ **On Screen Graphic User Interface** features easy-to-use, computer-like drop down menus.

Special Features for Dynamic Presentations

■ **Digital Zoom** Enlarge any portion of the screen image up to 10 times. You can also freeze and pan images.

■ **Picture-in-Picture** View a second video source in a smaller inset window. Switch between sources with the touch of a remote button.

DigitAllfunctionality

■ **Advanced Compatibility** All Samsung plasma monitors come equipped with component, S-video and RGB/HV inputs. They're even PC-compatible with D-sub 15-pin PC inputs and a resolution of XGA or better.

■ **Professional Performance You Can Count On** Samsung plasma monitors feature advanced Samsung technology that makes them uniquely suited for the rigors of professional use.

■ **Auto Pixel Shift** Greatly reduces screen aging irregularities and burn-in caused by bright still images.

■ **Cooling Fans** Whisper-quiet fans ensure reliable extended performance in even the most demanding environments.

Easy, Versatile Installation

■ **Built-in carrying handle** simplifies handling during installation.

■ **Optional Accessories** include a Table Stand Kit, a Wall Mount Kit, and matching speakers that attach directly to the plasma display.

■ **Universal Remote** Every feature and function is at your fingertips.

PPM42S2 & PPM50H2

Versatile and stylish, the PPM42S2 plasma monitor is perfect

for the conference room, tradeshow booths, retail stores, hotels and airport terminals. At a depth of just 3.5 inches, you can arrange this 42-inch flat panel monitor in any way you desire — on a stand, on a wall or hung from the ceiling.

With PC, DVD and DTV inputs built-in, it offers true plug-and-play capability — and tremendous versatility to fit a multitude of uses ■

- 42" diagonal screen
- 16:9 aspect ratio
- 852 x 480 native resolution
- Slim design — only 3.5" deep

Samsung plasma displays feature a built-in 7W x 7W stereo audio amplifier with external speaker jacks for use with optional slimline speakers. You can attach speakers to the monitor, or stand them next to the monitor for a seamlessly integrated audio solution.

PPM42S2

PPM50H2

PPM63H1

Looking for the best way to really impress an audience? You've found it. With a 63-inch screen the Samsung PPM63H1 is the world's largest plasma display. Yet it's still only 3.5" deep. Perfect when you really want to make an impression, the PPM63H1 gets your message across with tremendous impact. You don't just see images. You experience them ■

- 63" diagonal screen
- 16:9 aspect ratio
- 1366 x 768 native resolution
- Slim design — only 3.5" deep
- HDTV-ready

There are no distortions with Samsung plasma monitors, because the screen is perfectly flat. The clear and sharply-focused image extends to every corner.

Available **September 2002.**

Conference Room
Make powerful business presentations involving a range of signal sources, including computer graphics, VCRs, DVDs and more.

No matter what the application or venue, there's a Samsung plasma monitor to meet your exact needs. Below are just a few of the places where you'll find Samsung plasma monitors right at home.

A DigitAlldisplay for Any Environment

Tradeshow
With Samsung flexibility and easy connectivity, you can create short-term display environments with a minimum of setup time.

Retail

From showcasing the latest designer fashions to presenting the hottest videos, Samsung plasma displays are perfect for creating a stylish mood in retail environments.

Control Room

Clear text, eye-catching graphics and easy-to-install mounting options make Samsung plasma displays ideal for installation in control facilities.
