

# HORIZON ELECTROL®

## View Multiple Image Formats with the Same Screen

- The Horizon Electrol is the first screen available allowing four position masking with the touch of a button.
- Dry contacts are provided on the electronic controller so you can adjust the screen to the factory presets from a properly equipped projector or master control.
- Careful engineering ensures the masking remains flush against the surface of the screen, preventing distracting shadows around the projected image.
- Equipped with a six-button wall switch, you can automatically open and close the screen, halt operation and position the screen into any of the four aspect ratios.

Matte White fabric up to and including 10' high will be seamless. Video Spectra® 1.5 fabric up to and including 8' high will be seamless. High Power fabric up to and including 6' high will be seamless.

Optional remote control operation.
