

Plasmavision™ *W*

42" Color Plasma Display Monitor

# The Display of the 21st Century, that fully loads attractive functions in its stylish body.

## High Definition & High Quality Picture

### High Resolution

Equipped with a high resolution panel of 1024×1024 pixels in an aspect ratio of 16:9. The display is compatible with 1080i HDTV format of the next generation high picture quality digital system. Also displays various picture signals such as XGA, SVGA, VGA computer images.

### High Brightness

High brightness of 500 cd/m<sup>2</sup> (+80% compared to our conventional model)

## High Function & Convenience Design

### Improvement for Installation

- ① The cables can be connected after mounting the display on a wall. (using optional wall mount bracket)
- ② Cross shaped indent structure for easy and neat cabling arrangement.
- ③ Connector cover to hide connector cables in the rear for neat appearance.

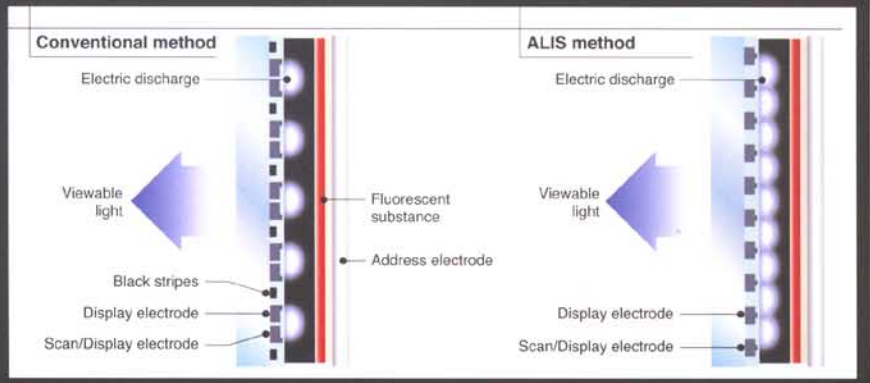

### Variety of Input Terminals for the Digitalization Age

- ① **Component video input**×1···HD signal(1080i/720p) and 480i/480p signal in high quality pictures.
- ② **RGB input**×2···Complies with XGA high resolution input signal.
- ③ **S-Video input**×1/**Composite Video input**×1
- ④ **7W+7W audio amplifier and external speaker terminal**···Optional speaker has versatile installation such as attaching to both sides of the display or using as desktop type. (optional speaker and speaker stand)
- ⑤ **Wide function of display mode**···Normal/Auto/Wide 1/Wide 2/Zoom 1/Zoom 2 are available to match various aspect ratio signals.
- ⑥ **Complies with worldwide video systems**···NTSC/4.43NTSC/PAL/SECAM/M-PAL/N-PAL signals.

## ALIS method (Alternate Lighting of Surfaces method)

High definition and high brightness is realized by displaying 1024 scanning lines with same 512 lines of scanning electrodes as conventional system, by discharging alternately the spaces between the display electrodes and the scanning display electrodes, not being used in the conventional system.

## Super-Thin (85mm) and Light Weight (31.5kg)

## Complying with Electromagnetic Wave Standard Class B

Electromagnetic wave standard class B, required in the home market all over the world, is achieved. (Model PDS4222)

## User Friendly Operation

- ① Retractable function keys under the unit
- ② Remote control unit with multi function keys
- ③ ICON style on-screen display (vertical/horizontal selectable)

simple remote controller

## Various Functions

- ① The display ID function (individual remote control possible up to 4 sets for multi screen applications)
- ② The remote control function through connected PC using RS-232C terminal. (on-off and input mode change)
- ③ Input signal priority function. (Automatic priority picture display)
- ④ DPMS (Display Power Management Signaling) function for power saving.
- ⑤ Screen saver function to minimize phosphor burn-in.

Possible to make the most suitable system integration for every possible scenes,  
 [Plasmavision™] will change visual communications.

\*The plasma display has been built using extremely precise and sophisticated technologies. More than 99.99% of its pixels are effective. However, a minute number of pixels are missing or constantly lit.  
 \*Do not display the same picture (pattern) continuously for a long time. It may cause after-images.  
 \*Plasmavision™ is a worldwide trademark of Fujitsu General Limited and is a registered trademark in Japan, U.S.A. and other countries or areas.  
 \*Specifications and design subject to change without notice for further improvement.  
 \*Plasmavision™ will not be affected by the problem related with the major date change from December 31, 1999 to January 1, 2000. (so called the Year 2000 transition problem of computer)
