

ScreenPlay™ 4805

Easy to use, fun to watch

**InFocus®**  
ScreenPlay®

### Looking for a big screen?

It's the size of the image that puts entertainment in home entertainment. With a screen size up to 9 feet, the InFocus ScreenPlay 4805 projector makes those so-called big-screens seem puny. Have a theater in your home, developed from award-winning InFocus engineering and paired with specialized ScreenPlay home theater technology, the InFocus ScreenPlay 4805 is easy to setup and use with your DVD player, cable or satellite receiver, VCR, digital camera, game player and more! You'll never just watch a movie again.

### The only place outside the court that basketball stars are really 6'8".

The ScreenPlay 4805 home entertainment projector gives you a diagonal screen size that's measured in feet, not inches. As in up to 9 feet wide (2.74 meters). So big, basketball players will be life-size, football players look 300 pounds and golf balls are so big you can count the dimples. And video game characters are so lifelike they look like they might actually take you on. The already huge image also has an optical zoom lens that lets you expand the image to fit virtually any size screen from any location, in perfect focus and clarity. Native 16:9 widescreen format gives you movie-theater format, so you—and all of your friends—won't miss a bit of the action.

# ScreenPlay™ 4805

## Action heroes shouldn't look like action figures.

Surprisingly, many home theaters lack a large image display. Only projection can deliver monumental images. Fifty-inch screens seem laughable after you experience the ScreenPlay 4805. This projector will open your eyes to a new image definition and clarity that's far superior to television options—and nothing produces a thinner image than projection.

## More than just big. It's breathtaking.

Stunning images come from attention to detail. The ScreenPlay 4805 uses native 16:9 DarkChip2™ DLP technology from Texas Instruments®, the only display solution that creates an entirely digital connection between a source and the screen in front of you. You see maximum fidelity — a picture clarity, brilliance and color that must be seen to be believed. Coupled with Academy-award-winning enhanced Faroudja DCDi™ video processing, the images are produced with ultimate fidelity: clear and artifact-free, without those jagged lines you see on some large-format displays. With Faroudja DCDi there is no need to buy external boxes to enhance the deinterlacing. InFocus has integrated Faroudja into several generations of ScreenPlay projectors and has perfected the optimal deinterlacing process for perfect output from your projector, regardless of the source. In fact, Faroudja DCDi on-board makes your viewing experience so enjoyable, you forget you're not in a multi-million dollar movie theater. And 750 video-optimized lumens combined with 2000:1 calibrated contrast ratio, all in native DVD format and able to scale HDTV, the image is always crisp and lifelike. In fact, no other display solution comes close to producing images that are this huge and this amazing.

## Incredible movies, games, TV, and more.

The best news is that your ScreenPlay 4805 doesn't just play movies — it projects everything in amazing color, size and clarity. Plug in any type of game box to project games so big an arcade would envy them. Or show off your vacation photos from your digital camera or your home movies from your camcorder. Virtually any digital source is compatible with the ScreenPlay 4805. It's also compatible and connects easily with your VCR, DVD player, or satellite receiver. And you can project with the ScreenPlay 4805 from your coffee table or mount it to your wall or ceiling.

# ScreenPlay™ 4805

## Heavyweight features. Lightweight package.

Not that your friends and family will ever give it a moment's rest once they've experienced it, but should you ever want to take your ScreenPlay 4805 to a friend's house or on a trip, it's easy. Just 7.8 lbs (3.5 kg) and about the size of a toaster you won't need to rent a crew to help you carry it. Just be warned—when friends say they want to “borrow” it, you may never see it again.

## The InFocus commitment.

Experience for yourself why InFocus Corporation is the worldwide leader in large format digital display. InFocus makes more projectors than anyone else in the world. Our dedication to quality and customer satisfaction is reflected in service options that will bring you a greater return on your investment. InFocus ScreenPlay projectors come with a standard two-year limited factory warranty, including parts and labor, and a 90-day lamp replacement. Our customer support offers you premium service and convenience, whatever your needs.
