SERIOUS IMAGE QUALITY

Going for incredible images?
Get to know the technology inside the X1—Digital Light Processing (DLP™) technology from Texas Instruments. It's the world's only all-digital display solution. Based on a unique, fast, digital, reflective semiconductor called the Digital Micromirror Device, or DMD, DLP™ projects large, high-contrast images with unmatched color fidelity and consistency. With Faroudja DCDi™ processing, each image is recreated with maximum fidelity, so you enjoy clear, sharp pictures and brilliant colors. And its wide-screen capability lets you enjoy amazing video performance in a movie-theater format.

SERIOUS DEPENDABILITY

You can count on the X1's superior quality for an exceptionally long time. Its long-life lamp shines for an incredible 3000 hours. So sit back. Relax. Enjoy.

SERIOUS VALUE

Never before has such a combination of image quality, dependability, and flexibility been available at such a low cost of ownership. The X1's combination of features has never been so affordable.

EASY. SERIOUSLY.

Get started right away with intuitive keypads, remote controls, and menus. Hookups are simple with color-coded connections. It's even easy to carry: at a mere 6.8 lbs/ 3.1 kg, the X1 is lightweight and super-portable. Connect two sources simultaneously for seamless switching and simple content integration.

SERIOUS COMMITMENT

InFocus Corporation is the worldwide leader in digital projection. Our dedication to quality and customer satisfaction is reflected in service options that will bring you a greater return on your investment. Most InFocus projectors come with a standard two-year limited factory warranty, including parts and labor and a 90-day lamp replacement. Our customer support offers you premium service and convenience, whatever your needs.
